REFERENCE NOTES

Additional information regarding the climate of California may be obtained by writing to the Weather Bureau State Climatologist, 557 Federal Office Building, 50 Fulton Street, San Francisco 2, California, or to any Weather Bureau Office near you.

Figures and letters following the station name, such as 12 SSW, indicate distance in miles and direction from the post office.

Delayed data and corrections will be carried only in the June and December issues of this bulletin.

Monthly and seasonal snowfall and heating degree days, also seasonal total precipitation for the 12 months ending with the June data will be carried in the July issue of this bulletin.

Stations appearing in the Index, but for which data are not listed in the tables, are either missing or received too late to be included in this issue.

Divisions, as used in "Climatological Data" Table, became effective with data for January 1941.

Unless otherwise indicated, dimensional units used in this bulletin are: Temperature in °F., precipitation and evaporation in inches and wind movement in miles. Monthly degree day totals are the sums of the negative departures of average daily temperatures from 65°F.

Evaporation is measured in the standard Weather Bureau type pan of 4-foot diameter unless otherwise shown by footnote following the "Evaporation and Wind" Table.

Normals for all stations are climatological standard normals based on the period 1931 - 1960.

Water equivalent values published in the "Snowfall and Snow on Ground" Table are the water equivalent of snow, sleet, or ice on the ground. Samples for obtaining measurements are taken from different points for successive observations; consequently occasional drifting and other causes of local variability in the snowpack may result in apparent inconsistencies in the record.

Entries of snowfall in the "Climatological Data" Table and the "Snowfall and Snow on Ground" Table, and in the "Seasonal Snowfall" Table include snow and sleet. Entries of snow on ground include snow, sleet, and ice.

Data in the "Monthly Extremes"; "Daily Precipitation" Table; "Daily Temperature" Table; and "Evaporation and Wind" Table, and snowfall in the "Snowfall and Snow on Ground" Table, when published, are for the 24 hours ending at time of observation. The Station Index shows observation times in local standard time. (During the summer months some observers take the observations on daylight saving time.)

Snow on ground in "Snowfall and Snow on Ground" Table is at observation time for all except Weather Bureau and FAA stations. For these stations snow on ground values are at 4:00 a.m. PST, except for Bishop WB AP, Blue Canyon WB AP, and Sandberg WB which are taken at 6:00 a.m. PST, and Mt. Shasta WB City at 8:00 a.m. PST.

In the Station Index the letters C, G, H, J, and S in the "Special" column under the heading "Observation Time and Tables", indicate the following:

C Weighing Rain Gage Recording Station. Hourly precipitation values are processed for special purposes, and are published later in "Hourly Precipitation Data" Bulletin.

G "Soil Temperature" Table.

H "Snowfall and Snow on Ground" Table.

J "Supplemental Data" Table.

S Storage Precipitation Station. Precipitation measurements, made at irregular intervals, will be published later in "Storage-Gage Precipitation Data" Bulletin.

No record in the "Climatological Data" Table and the "Daily Temperature" Table is indicated by no entry.

Interpolated values for monthly precipitation totals may be found in the annual issue of this publication.

\- No record in the "Supplemental Data" Table; "Daily Precipitation" Table; "Evaporation and Wind" Table; "Snowfall and Snow on Ground" Table; "Daily Soil Temperature" Table; and the Station Index.

\+ And on an earlier date or dates.

++ Fastest observed one minute wind speed. This station is not equipped with automatic wind instruments.

* Amount included in following measurement, time distribution unknown.

\# Thermometers are generally exposed in a shelter located a few feet above sod-covered ground; however, the reference indicates that the thermometers are exposed in a shelter located on the roof of a building.

// Gage is equipped with a windshield.

AR This entry in time of observation column in Station Index means after rain.

B Adjusted to a full month.

D Water equivalent of snowfall wholly or partly estimated, using a ratio of 1 inch water equivalent to every 10 inches of new snowfall.

M One or more days of record missing; if average value is entered, less than 10 days record is missing. See "Daily Temperature" Table for detailed daily record. Degree day data, if carried for this station, have been adjusted to represent the value for a full month.

R Amounts from recording gage. (These amounts are essentially accurate but may vary slightly from the amounts to be published later in Hourly Precipitation Data.)

SS This entry in time of observation column in Station Index means observation made near sunset.

T Trace , an amount too small to measure.

V Includes total for previous month.

VAR This entry in time of observation column in Station Index means variable.

General Weather conditions in the U.S. for each month are described in the publications MONTHLY WEATHER REVIEW, MONTHLY CLIMATOLOGICAL DATA - NATIONAL SUMMARY, and STORM DATA, all of which may be obtained from the Superintendent of Documents, Government Printing Office, Washington 25, D. C.

Information concerning the history of changes in locations, elevations, exposure, etc., of substations through 1957 may be found in the publication SUBSTATION HISTORY for this state. That publication may be obtained from the Superintendent of Documents, Government Printing Office, Washington 25, D.C. for $1.25. Similar information for regular Weather Bureau stations may be found in the 1961 annual issues of Local Climatological Data, obtained as indicated above, price 15 cents.

Subscription Price: 20 cents per copy, monthly and annual; $2.50 per year. (Yearly subscription includes the Annual Summary.) Checks and money orders should be made payable to the Superintendent of Documents. Remittances and correspondence regarding subscriptions should be sent to the Superintendent of Documents, Government Printing Office, Washington 25, D. C.

CLIMATOLOGICAL DATA

CALIFORNIA

SEPTEMBER 1963
Volume 67 No. 9

ASHEVILLE: 1963

TEMPERATURE AND PRECIPITATION EXTREMES

Highest Temperature: 116° on the 28th at Palm Springs

Lowest Temperature: 20° on the 19th at White Mountain 2

Greatest Total Precipitation: 7.74 inches at Squirrel Inn 1

Least Total Precipitation: 0.00 inch at 20 stations

Greatest One-Day Precipitation: 4.35 inches on the 18th at Squirrel Inn 2

Greatest Reported Total Snowfall: 5.0 inches at White Mountain 2

Greatest Reported Depth of Snow on Ground: 3 inches on the 20th at White Mountain 2

SPECIAL WEATHER SUMMARY

Temperatures averaged above normal over the entire State, with the greatest departures in the southern half. New records were established, however, in many areas. Following are some notes relating to these high temperatures.

Eureka: The 11th was the warmest September day since 1958, and the warmest day of any month since October 1960. Red Bluff: 105° on the 4th was the highest temperature of the year, and 103° on the 26th came within 1° of being the warmest ever recorded so late in the year. Sacramento: New record highs for the 26th and 27th and new record high minimum on the 27th; also the highest temperature so late in the season on the 26th. Fresno: Warmest September since 1947; 107° on the 26th the highest for the year and the highest ever recorded so late in the season. Bakersfield: 107° on the 26th the highest so late in the season. Santa Maria: Warmest September since 1958. Burbank: Hot spell near end of month; the highest temperatures in last 7 years, and highest so late in season. Los Angeles: Warmest September of record, and second warmest month of any name. 110° at Los Angeles Airport on 26th set new record, and four consecutive days above 100° also set a new record. San Diego: Warmest month of any name since record started in 1872. Five days of 90° or higher set new record. Average temperature of 92° on 26th set new alltime record. 111° on 26th was highest temperature ever recorded, and new maximum records for dates were set on 25th, 26th, 27th, and 28th.

Most parts of the State received greater than normal precipitation, and departures were substantial in the southern part of the State. Bakersfield experienced the wettest September since 1903, and Santa Maria the wettest since 1958. Precipitation at Burbank has been exceeded in September only in 1939; 5 days of rain this year are the greatest number ever recorded in September. San Diego and Los Angeles City reported the second wettest September of record, and Los Angeles Airport the third wettest. Los Angeles noted that previous substantial rains in September have fallen after the 24th of the month, while this year's precipitation fell before the 20th. Fresno reported the least September sunshine since 1939. At the other extreme, Red Bluff reported that this was the first year since 1949 when a measurable amount of precipitation has not been reported between July 1 and September 30.

Storms: Rain, wind, and lightning were responsible for most of the storm damage reported during September. On the 4th and 5th the desert area of southern California received damage from highway flooding, downed trees, and utility lines, and in the San Joaquin Valley there was damage to drying raisins. Some forest and brush fires were reported. Southern and central California received similar damage on the 12th and 13th, and tomato crops experienced some loss. On the 17th and 18th rain again caused damage in the southern half of the State, and wind damaged some buildings and trailers. Beach properties were damaged on the 16th and 17th in the Orange County area by heavy surf.

REFERENCE NOTES

Additional information regarding the climate of California may be obtained by writing to the Weather Bureau State Climatologist, 557 Federal Office Building, 50 Fulton Street, San Francisco 2, California, or to any Weather Bureau Office near you.

Figures and letters following the station name, such as 12 SSW, indicate distance in miles and direction from the post office.

Delayed data and corrections will be carried only in the June and December issues of this bulletin.

Monthly and seasonal snowfall and heating degree days, also seasonal total precipitation for the 12 months ending with the June data will be carried in the July issue of this bulletin.

Stations appearing in the Index, but for which data are not listed in the tables, are either missing or received too late to be included in this issue.

Divisions, as used in "Climatological Data" Table, became effective with data for January 1941.

Unless otherwise indicated, dimensional units used in this bulletin are: Temperature in °F., precipitation and evaporation in inches and wind movement in miles. Monthly degree day totals are the sums of the negative departures of average daily temperatures from 65°F.

Evaporation is measured in the standard Weather Bureau type pan of 4-foot diameter unless otherwise shown by footnote following the "Evaporation and Wind" Table.

Normals for all stations are climatological standard normals based on the period 1931 - 1960.

Water equivalent values published in the "Snowfall and Snow on Ground" Table are the water equivalent of snow, sleet, or ice on the ground. Samples for obtaining measurements are taken from different points for successive observations; consequently occasional drifting and other causes of local variability in the snowpack may result in apparent inconsistencies in the record.

Entries of snowfall in the "Climatological Data" Table and the "Snowfall and Snow on Ground" Table, and in the "Seasonal Snowfall" Table include snow and sleet. Entries of snow on ground include snow, sleet, and ice.

Data in the "Monthly Extremes"; "Daily Precipitation" Table; "Daily Temperature" Table; and "Evaporation and Wind" Table, and snowfall in the "Snowfall and Snow on Ground" Table, when published, are for the 24 hours ending at time of observation. The Station Index shows observation times in local standard time. (During the summer months some observers take the observations on daylight saving time.)

Snow on ground in "Snowfall and Snow on Ground" Table is at observation time for all except Weather Bureau and FAA stations. For these stations snow on ground values are at 4:00 a.m. PST, except for Bishop WB AP, Blue Canyon WB AP, and Sandberg WB which are taken at 6:00 a.m. PST, and Mt. Shasta WB City at 8:00 a.m. PST.

In the Station Index the letters C, G, H, J, and S in the "Special" column under the heading "Observation Time and Tables", indicate the following:

C Weighing Rain Gage Recording Station. Hourly precipitation values are processed for special purposes, and are published later in "Hourly Precipitation Data" Bulletin.

G "Soil Temperature" Table.

H "Snowfall and Snow on Ground" Table.

J "Supplemental Data" Table.

S Storage Precipitation Station. Precipitation measurements, made at irregular intervals, will be published later in "Storage-Gage Precipitation Data" Bulletin.

No record in the "Climatological Data" Table and the "Daily Temperature" Table is indicated by no entry.

Interpolated values for monthly precipitation totals may be found in the annual issue of this publication.

\- No record in the "Supplemental Data" Table; "Daily Precipitation" Table; "Evaporation and Wind" Table; "Snowfall and Snow on Ground" Table; "Daily Soil Temperature" Table; and the Station Index.

\+ And on an earlier date or dates.

++ Fastest observed one minute wind speed. This station is not equipped with automatic wind instruments.

* Amount included in following measurement, time distribution unknown.

\# Thermometers are generally exposed in a shelter located a few feet above sod-covered ground; however, the reference indicates that the thermometers are exposed in a shelter located on the roof of a building.

// Gage is equipped with a windshield.

AR This entry in time of observation column in Station Index means after rain.

B Adjusted to a full month.

D Water equivalent of snowfall wholly or partly estimated, using a ratio of 1 inch water equivalent to every 10 inches of new snowfall.

M One or more days of record missing; if average value is entered, less than 10 days record is missing. See "Daily Temperature" Table for detailed daily record. Degree day data, if carried for this station, have been adjusted to represent the value for a full month.

R Amounts from recording gage. (These amounts are essentially accurate but may vary slightly from the amounts to be published later in Hourly Precipitation Data.)

SS This entry in time of observation column in Station Index means observation made near sunset.

T Trace , an amount too small to measure.

V Includes total for previous month.

VAR This entry in time of observation column in Station Index means variable.

General Weather conditions in the U.S. for each month are described in the publications MONTHLY WEATHER REVIEW, MONTHLY CLIMATOLOGICAL DATA - NATIONAL SUMMARY, and STORM DATA, all of which may be obtained from the Superintendent of Documents, Government Printing Office, Washington 25, D. C.

Information concerning the history of changes in locations, elevations, exposure, etc., of substations through 1957 may be found in the publication SUBSTATION HISTORY for this state. That publication may be obtained from the Superintendent of Documents, Government Printing Office, Washington 25, D.C. for $1.25. Similar information for regular Weather Bureau stations may be found in the 19 it annual issues of Local Climatological Data, obtained as indicated above, price 15 cents.

Subscription Price: 20 cents per copy, monthly and annual; $2.50 per year. (Yearly subscription includes the Annual Summary.) Checks and money orders should be made payable to the Superintendent of Documents. Remittances and correspondence regarding subscriptions should be sent to the Superintendent of Documents, Government Printing Office, Washington 25, D. C.

OCTOBER 1963
Volume 67 No. 10

ASHEVILLE: 1964

TEMPERATURE AND PRECIPITATION EXTREMES

Highest Temperature: 110° on the 2+ at Death Valley

Lowest Temperature: -3° on the 12th at White Mountain 1

Greatest Total Precipitation: 14.09 inches at Honeydew 2 WSW

Least Total Precipitation: Trace at Torrance

Greatest One-Day Precipitation: 9.02 inches on the 11th at Cecilville Sawyer

Greatest Reported Total Snowfall: 22.5 inches at White Mountain 2

Greatest Reported Depth of Snow on Ground: 17 inches on the 18th at White Mountain 2

SPECIAL WEATHER SUMMARY

Temperature: Mean temperatures along the coast were above normal during the month, ranging from 0.7° to 4.5°. Interior valley temperatures were near or below normal by as much as 2.0°. Fresno had a plus departure of 1.1° while recording the least sunshine for October in 22 years. Sacramento observed a maximum of 97° on the 1st, the highest ever recorded for that date, and a minimum of 43° as an alltime record for the 31st. San Diego had the second highest and Los Angeles the third highest mean temperature of record.

Precipitation: With a few exceptions all parts of the State received more than the normal amount of precipitation. Only 2 first order stations, Bishop and San Diego, reported less than the expected total. Heavy rains from a 3-day storm in the southeastern interior brought accrued seasonal totals up to 300 to 400 percent of normal.

Storms: On the 4th, lightning struck and destroyed an oil storage tank near Dos Palos. Central California received heavy rain with some wind damage on the 11th, resulting in local flooding and minor property damage; utilities were disrupted. There was some damage to crops in interior valleys. On the 17th, 18th, and 19th an intense electrical storm accompanied by heavy rain in Southern California caused considerable damage to crops, flooding homes, stores, and highways. Mud slides and washed-out highways interrupted traffic, with 8 deaths attributed to rain-slick roads. Powerlines were knocked out and communication interrupted.

REFERENCE NOTES

Additional information regarding the climate of California may be obtained by writing to the Weather Bureau State Climatologist, 557 Federal Office Building, 50 Fulton Street, San Francisco 2, California, or to any Weather Bureau Office near you.

Figures and letters following the station name, such as 12 SSW, indicate distance in miles and direction from the post office.

Delayed data and corrections will be carried only in the June and December issues of this bulletin.

Monthly and seasonal snowfall and heating degree days, also seasonal total precipitation for the 12 months ending with the June data will be carried in the July issue of this bulletin.

Stations appearing in the Index, but for which data are not listed in the tables, are either missing or received too late to be included in this issue.

Divisions, as used in "Climatological Data" Table, became effective with data for January 1941.

Unless otherwise indicated, dimensional units used in this bulletin are: Temperature in °F., precipitation and evaporation in inches and wind movement in miles. Monthly degree day totals are the sums of the negative departures of average daily temperatures from 65°F.

Evaporation is measured in the standard Weather Bureau type pan of 4-foot diameter unless otherwise shown by footnote following the "Evaporation and Wind" Table.

Normals for all stations are climatological standard normals based on the period 1931 - 1960.

Water equivalent values published in the "Snowfall and Snow on Ground" Table are the water equivalent of snow, sleet, or ice on the ground. Samples for obtaining measurements are taken from different points for successive observations; consequently occasional drifting and other causes of local variability in the snowpack may result in apparent inconsistencies in the record.

Entries of snowfall in the "Climatological Data" Table and the "Snowfall and Snow on Ground" Table, and in the "Seasonal Snowfall" Table include snow and sleet. Entries of snow on ground include snow, sleet, and ice.

Data in the "Monthly Extremes"; "Daily Precipitation" Table; "Daily Temperature" Table; and "Evaporation and Wind" Table, and snowfall in the "Snowfall and Snow on Ground" Table, when published, are for the 24 hours ending at time of observation. The Station Index shows observation times in local standard time. (During the summer months some observers take the observations on daylight saving time.)

Snow on ground in "Snowfall and Snow on Ground" Table is at observation time for all except Weather Bureau and FAA stations. For these stations snow on ground values are at 4:00 a.m. PST, except for Bishop WB AP, Blue Canyon WB AP, and Sandberg WB which are taken at 6:00 a.m. PST, and Mt. Shasta WB City at 8:00 a.m. PST.

In the Station Index the letters C, G, H, J, and S in the "Special" column under the heading "Observation Time and Tables", indicate the following:

C Weighing Rain Gage Recording Station. Hourly precipitation values are processed for special purposes, and are published later in "Hourly Precipitation Data" Bulletin.

G "Soil Temperature" Table.

H "Snowfall and Snow on Ground" Table.

J "Supplemental Data" Table.

S Storage Precipitation Station. Precipitation measurements, made at irregular intervals, will be published later in "Storage-Gage Precipitation Data" Bulletin.

No record in the "Climatological Data" Table and the "Daily Temperature" Table is indicated by no entry.

Interpolated values for monthly precipitation totals may be found in the annual issue of this publication.

\- No record in the "Supplemental Data" Table; "Daily Precipitation" Table; "Evaporation and Wind" Table; "Snowfall and Snow on Ground" Table; "Daily Soil Temperature" Table; and the Station Index.

\+ And on an earlier date or dates.

++ Fastest observed one minute wind speed. This station is not equipped with automatic wind instruments.

* Amount included in following measurement, time distribution unknown.

\# Thermometers are generally exposed in a shelter located a few feet above sod-covered ground; however, the reference indicates that the thermometers are exposed in a shelter located on the roof of a building.

// Gage is equipped with a windshield.

AR This entry in time of observation column in Station Index means after rain.

B Adjusted to a full month.

D Water equivalent of snowfall wholly or partly estimated, using a ratio of 1 inch water equivalent to every 10 inches of new snowfall.

M One or more days of record missing; if average value is entered, less than 10 days record is missing. See "Daily Temperature" Table for detailed daily record. Degree day data, if carried for this station, have been adjusted to represent the value for a full month.

R Amounts from recording gage. (These amounts are essentially accurate but may vary slightly from the amounts to be published later in Hourly Precipitation Data.)

SS This entry in time of observation column in Station Index means observation made near sunset.

T Trace , an amount too small to measure.

V Includes total for previous month.

VAR This entry in time of observation column in Station Index means variable.

General Weather conditions in the U.S. for each month are described in the publications MONTHLY WEATHER REVIEW, MONTHLY CLIMATOLOGICAL DATA - NATIONAL SUMMARY, and STORM DATA, all of which may be obtained from the Superintendent of Documents, Government Printing Office, Washington 25, D. C.

Information concerning the history of changes in locations, elevations, exposure, etc., of substations through 1957 may be found in the publication SUBSTATION HISTORY for this state. That publication may be obtained from the Superintendent of Documents, Government Printing Office, Washington 25, D.C. for $1.25. Similar information for regular Weather Bureau stations may be found in the 1961 annual issues of Local Climatological Data, obtained as indicated above, price 15 cents.

Subscription Price: 20 cents per copy, monthly and annual; $2.50 per year. (Yearly subscription includes the Annual Summary.) Checks and money orders should be made payable to the Superintendent of Documents. Remittances and correspondence regarding subscriptions should be sent to the Superintendent of Documents, Government Printing Office, Washington 25, D. C.

NOVEMBER 1963
Volume 67 No. 11

ASHEVILLE: 1964

TEMPERATURE AND PRECIPITATION EXTREMES

Highest Temperature: 93° on the 13th at Indio U. S. Date Garden

Lowest Temperature: -5° on the 24+ at White Mountain 1

Greatest Total Precipitation: 22.21 inches at Branscomb 2 NW

Least Total Precipitation: 0.03 inch at Independence

Greatest One-Day Precipitation: 5.28 inches on the 14th at Strawberry Valley

Greatest Reported Total Snowfall: 82.5 inches at Twin Lakes

Greatest Reported Depth of Snow on Ground: 54 inches on the 26+ at Mount Shasta Ski Bowl

SPECIAL WEATHER SUMMARY

Temperature: Over most of the State temperatures averaged well below normal for the month. Exceptions were found along the coast and in the Bishop area, where temperatures were near or slightly above normal. Sacramento reported the fourth coldest November in the records, and Fresno experienced on the 30th the lowest maximum temperature ever recorded in November. Nine of the first 11 months of this year have been below normal in temperature at Sacramento.

Precipitation: Precipitation was above normal over most of the State. Red Bluff reported the total precipitation in October and November was in the upper 10 percent of values for those 2 months. Sacramento has reported only 8 Novembers with more precipitation in a total of 87 years of record.

Fresno reported the least amount of sunshine of any November of record and the greatest number of cloudy days. Burbank had the cloudiest November of record.

Storms: Wind on the 5th and 6th in the northern and central part of the State and on the 7th in the southern part caused some damage. Strong winds and heavy rain downed hundreds of trees in southern California coastal counties on the 19th and 20th, disrupting utility lines, causing local flooding, and resulting in numerous automobile accidents.

REFERENCE NOTES

Additional information regarding the climate of California may be obtained by writing to the Weather Bureau State Climatologist, 557 Federal Office Building, 50 Fulton Street, San Francisco 2, California 94102 or to any Weather Bureau Office near you.

Figures and letters following the station name, such as 12 SSW, indicate distance in miles and direction from the post office.

Delayed data and corrections will be carried only in the June and December issues of this bulletin

Monthly and seasonal snowfall and heating degree days, also seasonal total precipitation for the 12 months ending with the June data will be carried in the July issue of this bulletin.

Stations appearing in the Index, but for which data are not listed in the tables, are either missing or received too late to be included in this issue.

Divisions, as used in "Climatological Data" Table, became effective with data for January 1941.

Unless otherwise indicated, dimensional units used in this bulletin are: Temperature in °F., precipitation and evaporation in inches and wind movement in miles. Monthly degree day totals are the sums of the negative departures of average daily temperatures from 65°F.

Evaporation is measured in the standard Weather Bureau type pan of 4-foot diameter unless otherwise shown by footnote following the "Evaporation and Wind" Table

Normals for all stations are climatological standard normals based on the period 1931 - 1960.

Water equivalent values published in the "Snowfall and Snow on Ground" Table are the water equivalent of snow, sleet, or ice on the ground. Samples for obtaining measurements are taken from different points for successive observations; consequently occasional drifting and other causes of local variability in the snowpack may result in apparent inconsistencies in the record

Entries of snowfall in the "Climatological Data" Table and the "Snowfall and Snow on Ground" Table, and in the "Seasonal Snowfall" Table include snow and sleet. Entries of snow on ground include snow, sleet, and ice.

Data in the "Monthly Extremes", "Daily Precipitation" Table, "Daily Temperature" Table, and "Evaporation and Wind" Table, and snowfall in the "Snowfall and Snow on Ground" Table, when published, are for the 24 hours ending at time of observation. The Station Index shows observation times in local standard time. (During the summer months some observers take the observations on daylight saving time.)

Snow on ground in "Snowfall and Snow on Ground" Table is at observation time for all except Weather Bureau and FAA stations. For these stations snow on ground values are at 4:00 a.m. PST, except for Bishop WB AP, Blue Canyon WB AP, and Sandberg WB which are taken at 6:00 a.m. PST, and Mt. Shasta WB City at 8.00 a.m. PST.

In the Station Index the letters C, G, H, J, and S in the "Special" column under the heading "Observation Time and Tables", indicate the following

C Weighing Rain Gage Recording Station. Hourly precipitation values are processed for special purposes, and are published later in "Hourly Precipitation Data" Bulletin.

G "Soil Temperature" Table.

H "Snowfall and Snow on Ground" Table.

J "Supplemental Data" Table.

S Storage Precipitation Station. Precipitation measurements, made at irregular intervals, will be published later in "Storage-Gage Precipitation Data" Bulletin.

No record in the "Climatological Data" Table and the "Daily Temperature" Table is indicated by no entry.

Interpolated values for monthly precipitation totals may be found in the annual issue of this publication.

– No record in the "Supplemental Data" Table; "Daily Precipitation" Table; "Evaporation and Wind" Table; "Snowfall and Snow on Ground" Table; "Daily Soil Temperature" Table; and the Station Index

\+ And on an earlier date or dates.

++ Fastest observed one minute wind speed. This station is not equipped with automatic wind instruments.

* Amount included in following measurement, time distribution unknown.

\# Thermometers are generally exposed in a shelter located a few feet above sod-covered ground; however, the reference indicates that the thermometers are exposed in a shelter located on the roof of a building

// Gage is equipped with a windshield.

AR This entry in time of observation column in Station Index means after rain.

B Adjusted to a full month.

D Water equivalent of snowfall wholly or partly estimated, using a ratio of 1 inch water equivalent to every 10 inches of new snow.

M One or more days of record missing; if average value is entered, less than 10 days record is missing. See "Daily Temperature" Table for detailed daily record. Degree day data, if carried for this station, have been adjusted to represent the value for a full month.

R Amounts from recording gage. (These amounts are essentially accurate but may vary slightly from the amounts to be published later in Hourly Precipitation Data.)

SS This entry in time of observation column in Station Index means observation made near sunset.

T Trace, an amount too small to measure

V Includes total for previous month.

VAR This entry in time of observation column in Station Index means variable.

General Weather conditions in the U S for each month are described in the publications MONTHLY WEATHER REVIEW, MONTHLY CLIMATOLOGICAL DATA - NATIONAL SUMMARY, and STORM DATA, all of which may be obtained from the Superintendent of Documents, Government Printing Office, Washington 25, D C

Information concerning the history of changes in locations, elevations, exposure, etc., of substations through 1957 may be found in the publication SUBSTATION HISTORY for this state. That publication may be obtained from the Superintendent of Documents, Government Printing Office, Washington 25, D.C. for $1.25. Similar information for regular Weather Bureau stations may be found in the 1961 annual issues of Local Climatological Data, obtained as indicated above, price 15 cents.

Subscription Price 20 cents per copy, monthly and annual, $2 50 per year (Yearly subscription includes the Annual Summary) Checks and money orders should be made payable to the Superintendent of Documents Remittances and correspondence regarding subscriptions should be sent to the Superintendent of Documents, Government Printing Office, Washington 25, D C

CLIMATOLOGICAL DATA

CALIFORNIA

DECEMBER 1963
Volume 67 No. 12

ASHEVILLE: 1964

TEMPERATURE AND PRECIPITATION EXTREMES

Highest Temperature: 90° on the 29th at Oceanside

Lowest Temperature: -13° on the 10th at White Mountain 2

Greatest Total Precipitation: 7.02 inches at Fort Dick 1 NNE

Least Total Precipitation: 0.00 inch at 81 stations

Greatest One-Day Precipitation: 2.40 inches on the 9th at Meyers 4 SW

Greatest Reported Total Snowfall: 29.0 inches at Mount Shasta Ski Bowl

Greatest Reported Depth of Snow on Ground: 49 inches on the 28th at Mount Shasta Ski Bowl

SPECIAL WEATHER SUMMARY

Temperatures were above normal over all mountain areas, in southern California, and on the north coast, but the central valley and the central coast were much colder than normal. Red Bluff reported that records for low maximum temperatures were equalled or exceeded from the 15th through the 18th. With a temperature of 77° on the 30th, Eureka reported the highest ever recorded in December, the highest temperature of 1963, and the highest reading since October 16, 1960. At Sacramento it was the third coldest December of record, the average maximum was the lowest of record, and new low maximum records were set on the 1st, 2d, 5th, 14th, and 15th, and the record was equalled on the 18th.

Fresno reported the coldest December of record and the second coldest month of any name. The average maximum was the lowest for any December, and new records were set for low maximum temperatures on 9 days. Bakersfield also had the coldest December of record. Average minimum temperatures at Santa Maria were the lowest since 1918; there were 20 days during the month with minimum of 32° or colder. At Burbank, on the other hand, the maximum equalled the record for that date on the 28th and exceeded it on the 29th. San Diego established a new high temperature for December and a new high record for the date on the 30th.

Precipitation was below normal in all parts of the State, departures of more than 8 inches being reported in some mountain areas. Following a period of well above normal precipitation during the fall and early winter, these deficiencies were great enough that nearly all areas closed the year with below normal accumulations since July 1. The snowpack in the mountains on January 1 was substantially below normal.

Mt. Shasta had the driest December since 1956 and the fourth driest of record. Red Bluff was also the driest since 1956. At Sacramento, Santa Maria, and Los Angeles it was the third driest December of record. At Santa Maria it was also the third driest since 1900.

The interior valley had an excessive amount of fog. Red Bluff reported 17 days with dense fog plus 10 more days with light fog. Sacramento had the third foggiest month of record and 26 cloudy days, more than any other December. Stockton reported visibility restricted by fog at some time on every day of the month. Fresno had the second foggiest month and the second lowest percentage of sunshine in the records. South of the Tehachapis, however, the picture was different. Los Angeles reported the second highest monthly total solar radiation for December, and San Diego had more sunshine than normal, the greatest of any December since 1953. They also had 25 clear days, the greatest number in any month since September 1956.

Storms: Heavy snow on the 9th blocked highways in the mountains of southern California, and strong winds blew a car off the highway resulting in deaths and injuries.

CORRECTIONS

Annual 1961	Evaporation and Wind Table	Antioch Pump Plant	Correct value of evaporation data for December 1.27 total 73.97.
Annual 1962	Station Index	Goose Lake West	Station closed December 31, 1962.
Annual 1962	Station Index	Soda Springs	Station closed July 17, 1959.
Annual 1962	Station Index	Willseyville	Station closed July 15, 1962.
Annual 1962	Average Temperature and Departure Table Total Precipitation and Departure Table	Oceanside	Delete record for July
July 1962	Seasonal Degree Day Table	Oceanside	Delete record for July 1962.
March 1963	Climatological Data Table	Grass Lake Maint Sta	Correct snowfall total 16.5.
March 1963	Climatological Data Table	Cuyamaca	Correct snowfall total 16.6
March 1963	Snowfall and Snow on Ground Table	Cuyamaca	Correct as follows Snowfall on 18th 5.0 total 16.6
April 1963	Daily Precipitation Table	Cachuma Dam	Correct total 2.31.
June 1963	Climatological Data Table	King City	Correct as follows: Precipitation total, .37, departure from normal, +.31. greatest day, .25 on 13th. No. of days .10, 2, .50, zero, 1.00, zero.
		Divisional Average	Average precipitation, .05. departure, - .08.
June 1963	Daily Precipitation Table	King City	Correct as follows Amount on 11th, .12. 13th, .25. total .37.
June 1963	Daily Precipitation Table	Mojave	Correct amount on 13th, .33; total .41.
July 1963	Climatological Data Table	Clearlake Highlands	Correct average max 89.3; average min 51.1; average 70.2.
July 1963	Daily Temperature Table	Clearlake Highlands	Correct Max on 7th, 83, Min 51; Average Max 89.3.
September 1963	Daily Soil Temperature Table	Riverside Citrus Exp Sta	Delete max and min soil temperatures from September 18 thru September 30th for 12 inch depths.
September 1963	Climatological Data Table	Valyermo RS	Correct as follows Total precipitation 2.29. departure 1.97. greatest day .90 on 19th. No. of days .10, 5, .50, 2.
September 1963	Daily Precipitation Table	Valyermo RS	Correct as follows Amount on 4th .23. 5th, .13. 13th, .03. 17th, .35. 18th, .65. 19th, .90. total 2.29.
October 1963	Climatological Data Table	Antioch Pump Plant	Correct as follows Average min temperature 49.7. average 62.4. degree days 88.
October 1963	Daily Temperature Table	Antioch Pump Plant	Correct 31st to 44 and average min to 49.7.
October 1963	Daily Soil Temperature Table	Riverside Citrus Exp Sta	Delete all max and min soil temperatures for the month on 12 inch depth. Reference note on Station #2 should read, irrigation water on 18 inch depth from 7 A.M. Oct. 23 to 7 A.M. Oct. 25 (48 hours).
October 1963	Climatological Data Table	Victorville Pump Sta.	Correct Total precipitation 0.96, greatest day of precip. 0.58 on 18, No. of days with .10 or more 2, .50 or more 1, 1.00 or more zero.
		Divisional Average	Average precipitation, 1.03. departure + .58.
October 1963	Daily Precipitation Table	Victorville Pump Sta.	Correct Amount on 3d, zero, total 0.96.
November 1963	Climatological Data Table	Citrus Heights	Correct total precipitation 5.95.
November 1963	Daily Precipitation Table	Citrus Heights	Correct as follows: 10th, +; 11th, +; 12th, V.03; total 5.95.
November 1963	Climatological Data Table	Deer Creek PH	Correct as follows: Total precipitation, 17.06; No. of days with precipitation .10 or more, 12; .50 or more, 10; monthly departure from normal 10.01; Divisional Average precipitation 8.32; departure from normal 4.74.
November 1963	Daily Precipitation Table	Deer Creek PH	Correct amount on 24th .66; monthly total 17.06.

REFERENCE NOTES

Additional information regarding the climate of California may be obtained by writing to the Weather Bureau State Climatologist, 557 Federal Office Building, 50 Fulton Street, San Francisco, California 94102 or to any Weather Bureau Office near you.

Figures and letters following the station name, such as 12 SSW, indicate distance in miles and direction from the post office.

Delayed data and corrections will be carried only in the June and December issues of this bulletin.

Monthly and seasonal snowfall and heating degree days, also seasonal total precipitation for the 12 months ending with the June data will be carried in the July issue of this bulletin.

Stations appearing in the Index, but for which data are not listed in the tables, are either missing or received too late to be included in this issue.

Divisions, as used in "Climatological Data" Table, became effective with data for January 1941.

Unless otherwise indicated, dimensional units used in this bulletin are: Temperature in °F., precipitation and evaporation in inches and wind movement in miles. Monthly degree day totals are the sums of the negative departures of average daily temperatures from 65°F

Evaporation is measured in the standard Weather Bureau type pan of 4-foot diameter unless otherwise shown by footnote following the "Evaporation and Wind" Table.

Normals for all stations are climatological standard normals based on the period 1931 - 1960.

Water equivalent values published in the "Snowfall and Snow on Ground" Table are the water equivalent of snow, sleet, or ice on the ground. Samples for obtaining measurements are taken from different points for successive observations, consequently occasional drifting and other causes of local variability in the snowpack may result in apparent inconsistencies in the record.

Entries of snowfall in the "Climatological Data" Table and the "Snowfall and Snow on Ground" Table, and in the "Seasonal Snowfall" Table include snow and sleet. Entries of snow on ground include snow, sleet, and ice

Data in the "Monthly Extremes", "Daily Precipitation" Table; "Daily Temperature" Table, and "Evaporation and Wind" Table, and snowfall in the "Snowfall and Snow on Ground" Table, when published, are for the 24 hours ending at time of observation The Station Index shows observation times in local standard time. (During the summer months some observers take the observations on daylight saving time.)

Snow on ground in "Snowfall and Snow on Ground" Table is at observation time for all except Weather Bureau and FAA stations. For these stations snow on ground values are at 4:00 a.m. PST, except for Bishop WB AP, Blue Canyon WB AP, and Sandberg WB which are taken at 6:00 a.m. PST, and Mt. Shasta WB City at 8:00 a.m. PST.

In the Station Index the letters C, G, H, J, and S in the "Special" column under the heading "Observation Time and Tables", indicate the following

C Weighing Rain Gage Recording Station Hourly precipitation values are processed for special purposes, and are published later in "Hourly Precipitation Data" Bulletin.

G "Soil Temperature" Table.

H "Snowfall and Snow on Ground" Table.

J "Supplemental Data" Table.

S Storage Precipitation Station. Precipitation measurements, made at irregular intervals, will be published later in "Storage-Gage Precipitation Data" Bulletin.

No record in the "Climatological Data" Table and the "Daily Temperature" Table is indicated by no entry.

Interpolated values for monthly precipitation totals may be found in the annual issue of this publication.

– No record in the "Supplemental Data" Table, "Daily Precipitation" Table; "Evaporation and Wind" Table; "Snowfall and Snow on Ground" Table; "Daily Soil Temperature" Table; and the Station Index

+ And on an earlier date or dates.

++ Fastest observed one minute wind speed. This station is not equipped with automatic wind instruments.

\# Amount included in following measurement, time distribution unknown

\# Thermometers are generally exposed in a shelter located a few feet above sod-covered ground; however, the reference indicates that the thermometers are exposed in a shelter located on the roof of a building.

// Gage is equipped with a windshield

AR This entry in time of observation column in Station Index means after rain.

B Augmented by bell earth

D Water equivalent of snowfall wholly or partly estimated, using a ratio of 1 inch water equivalent to every 10 inches of new snow.

M One or more days of record missing, if average value is entered, less than 10 days record is missing. See "Daily Temperature" Table for detailed daily record. Degree day data, if carried for this station, have been adjusted to represent the value for a full month.

R Annual [illegible] ending date (These amounts are essentially accurate but may vary slightly from the amounts to be published later in Hourly Precipitation Data.)

SS This entry in time of observation column in Station Index means observation made near sunset.

T Trace, an amount too small to measure.

V Includes total for previous month

VAR This entry in time of observation column in Station Index means variable

General Weather conditions in the U.S. for each month are described in the publications MONTHLY WEATHER REVIEW, MONTHLY CLIMATOLOGICAL DATA - NATIONAL SUMMARY, and STORM DATA, all of which may be obtained from the Superintendent of Documents, Government Printing Office, Washington 25, D. C.

Information concerning the history of changes in locations, elevations, exposure, etc., of substations through 1957 may be found in the publication SUBSTATION HISTORY for this state. That publication may be obtained from the Superintendent of Documents, Government Printing Office, Washington 25, D.C. for $1.25. Similar information for regular Weather Bureau stations may be found in the 1961 annual issues of Local Climatological Data, obtained as indicated above, price 15 cents

Subscription Price. 20 cents per copy, monthly and annual; $2.50 per year. (Yearly subscription includes the Annual Summary.) Checks and money orders should be made payable to the Superintendent of Documents. Remittances and correspondence regarding subscriptions should be sent to the Superintendent of Documents, Government Printing Office, Washington, D. C. 20402

(A) HOLTVILLE SILTY CLAY, BARE GROUND, EXPOSED TO SUN, LEVEL SURFACE. DATA FOR THE 4- AND 8-INCH DEPTHS FROM THERMOGRAPH. MONTHLY AVERAGES AT THESE DEPTHS ARE AVERAGES OF DAILY MAXIMUM AND MINIMUM VALUES. DATA FROM OTHER DEPTHS ARE FROM MERCURY-IN-GLASS THERMOMETERS. MONTHLY AVERAGES FROM THESE DEPTHS ARE AVERAGES OF SINGLE READINGS AT TIME SHOWN.

(B) SANDY LOAM - UNDER BARE GROUND SURFACE. DATA FROM SOIL THERMOGRAPH.

(C) RAMONA SANDY LOAM. DATA FROM AIR AND SOIL THERMOGRAPH.

(D) RAMONA SANDY LOAM UNDER THE EAST SKIRT OF A VALENCIA ORANGE TREE, SHADED AND UNDER REGULARLY IRRIGATED SOIL. DATA FROM AIR AND SOIL THERMOGRAPH. MONTHLY AVERAGES AT DAVIS 1 WSW AND RIVERSIDE CITRUS EXPERIMENT STATION ARE AVERAGES OF DAILY MAXIMUM AND MINIMUM VALUES. EXTREMES ARE THE HIGHEST AND LOWEST OBSERVED AT THE TIME INDICATED OR THE HIGHEST MAXIMUM AND THE LOWEST MINIMUM AVAILABLE.

See reference notes following Station Index

REFERENCE NOTES

Additional information regarding the climate of California may be obtained by writing to the State Climatologist at Weather Bureau Office, 557 Federal Office Building, 50 Fulton Street, San Francisco, California 94102, or to any Weather Bureau Office near you.

Unless otherwise indicated, dimensional units used in this bulletin are: Temperature in °F., precipitation and evaporation in inches, and wind movement in miles.

Evaporation is measured in the standard Weather Bureau type pan of 4-foot diameter unless otherwise shown by footnote following Table 4.

Normals for all stations are climatological normals based on the period 1931-1960. "DEP" in Table 4 refers to departures from normal, except for those stations indicated by $, for which long-term means based on periods varying from 10 to 29 years are used in place of normals.

Years of Record as shown in the Station Index are approximate since gaps in the records may not have been considered in arriving at the totals shown.

Climatological divisions outlined on the maps in this bulletin became effective with data for January 1941.

Figures and letters following the station name, such as 12 SSW, indicate distance in miles and direction from the post office.

Delayed data and corrections will be carried in the June and December issues of Climatological Data.

- ~ No record.
- + Also earlier date (dates) or months.
- * Amount included in following measurement.
- # Thermometers are generally exposed in a shelter located a few feet above sod-covered ground; however, the reference indicates that the thermometers are exposed in a shelter located on the roof of a building.
- // Gage is equipped with a windshield.
- B Adjusted to a full month.
- C Data for recorder stations denoted by "C" in the Refer to Tables column of the Station Index are processed for special purposes and published in "Hourly Precipitation Data". Length of record for recorder-only stations may be found in the annual issue of "Hourly Precipitation Data".
- E Amount is wholly or partially estimated.
- G In the Refer to Tables column of the Station Index the letter "G" indicates that soil temperatures are published.
- M One or more days' record missing; if average value is entered, less than 10 days' record is missing. See monthly Climatological Data for detailed daily record.
- R Amounts from recording gage. These amounts are essentially accurate but may vary slightly from the amounts to be published later in "Hourly Precipitation Data".
- S Storage precipitation station. Precipitation measurements, made at irregular intervals, will be published later in "Precipitation Data from Storage-Gage Stations" Bulletin.
- T Trace, an amount too small to measure.
- V Includes total for previous months. V in annual column means total is for a two-year period.

Information concerning the history of changes in locations, elevations, exposures, etc., of substations through 1957 may be found in the publication "Substation History" for this State. That publication may be obtained from the Superintendent of Documents, Government Printing Office, Washington, D. C. for $1.25. Similar information for regular Weather Bureau stations may be found in the latest annual issues of Local Climatological Data, obtained as indicated above, price 15 cents.

Subscription Price: 20 cents per copy, monthly and annual; $2.50 per year. (Yearly subscription includes the Annual Summary.) Checks and money orders should be made payable to the Superintendent of Documents. Remittances and correspondence regarding subscriptions should be sent to the Superintendent of Documents, Government Printing Office, Washington, D. C. 20402.

ASHEVILLE: 1964

TEMPERATURE AND PRECIPITATION EXTREMES

Highest Temperature: **89° on the 31st at Ojai**

Lowest Temperature: **-18° on the 23d at White Mountain 2**

Greatest Total Precipitation: **24.98 inches at Gasquet Ranger Station**

Least Total Precipitation: **0.00 inch at Blythe**

Greatest One-Day Precipitation: **8.98 inches on the 20th at Lakeshore**

Greatest Reported Total Snowfall: **195.0 inches at Mount Shasta Ski Bowl**

Greatest Reported Depth of Snow on Ground: **158 inches on the 25th at Mount Shasta Ski Bowl**

SPECIAL WEATHER SUMMARY

Temperature: All first-order Weather Bureau offices in the State reported below normal average temperatures for the month except for slightly above normal readings on the south coast and in the San Francisco Bay area. At Fresno the negative departure was 2.3°. Santa Maria reported the third lowest mean minimum temperature for January since 1907, yet the mean maximum temperature was above normal. At Red Bluff, this was the 11th consecutive month with below normal temperature.

Precipitation: Precipitation was well above normal on the north coast, and in portions of the central part of the State, particularly in the Sierras. Elsewhere the month was marked by a deficiency of precipitation. Most of the precipitation in the mountains fell as snow; the Mt. Shasta Ski Bowl had 120 inches of snow on the ground at the end of the month, and at Norder 132 inches of new snow fell between the 17th and the 23d.

Fog or ground fog was reported at Red Bluff on 19 days, and dense fog occurred on 8 days during the month. A new record of low relative humidity was set at the Los Angeles City Office on the 5th with a reading of 1 percent. San Diego reported 80 percent of possible sunshine, about 10 percent greater than normal.

Storms: On the 2d and 3d, high winds in the southern California area resulted in considerable damage to homes, farm buildings, and power lines. High seas destroyed seawalls and damaged beach homes and boats. Blowing dust reduced visibility on freeways to less than 50 feet at times. Hail 1/4 inch in diameter fell in San Diego on the 14th. The Smith and Eel Rivers and Redwood Creek, on the north coast, reached 2 to 8 feet above flood stage around the 20th. Red Bluff reported a fastest mile of wind of 56 m. p. h. on the 20th, with gusts to 63 m. p. h., and on the same date McClellan AFB in Sacramento reported gusts to 50 m. p. h. A tornado touched down for a distance of about 1 mile in the northern part of Fresno on the 21st. The path was only a few feet wide, and damage was limited to roofs, patios, trees, etc. Hailstones 1-1/4 inches in diameter were reported from a point 3 miles east of the Red Bluff Airport on the 22d.

REFERENCE NOTES

Additional information regarding the climate of California may be obtained by writing to the Weather Bureau State Climatologist, 557 Federal Office Building, 50 Fulton Street, San Francisco, California 94102 or to any Weather Bureau Office near you.

Figures and letters following the station name, such as 12 SSW, indicate distance in miles and direction from the post office.

Delayed data and corrections will be carried only in the June and December issues of this bulletin

Monthly and seasonal snowfall and heating degree days, also seasonal total precipitation for the 12 months ending with the June data will be carried in the July issue of this bulletin.

Stations appearing in the Index, but for which data are not listed in the tables, are either missing or received too late to be included in this issue.

Divisions, as used in "Climatological Data" Table, became effective with data for January 1941.

Unless otherwise indicated, dimensional units used in this bulletin are: Temperature in °F., precipitation and evaporation in inches and wind movement in miles. Monthly degree day totals are the sums of the negative departures of average daily temperatures from 65°F

Evaporation is measured in the standard Weather Bureau type pan of 4-foot diameter unless otherwise shown by footnote following the "Evaporation and Wind" Table.

Normals for all stations are climatological standard normals based on the period 1931 - 1960.

Water equivalent values published in the "Snowfall and Snow on Ground" Table are the water equivalent of snow, sleet, or ice on the ground. Samples for obtaining measurements are taken from different points for successive observations; consequently occasional drifting and other causes of local variability in the snowpack may result in apparent inconsistencies in the record

Entries of snowfall in the "Climatological Data" Table and the "Snowfall and Snow on Ground" Table, and in the "Seasonal Snowfall" Table include snow and sleet. Entries of snow on ground include snow, sleet, and ice

Data in the "Monthly Extremes"; "Daily Precipitation" Table; "Daily Temperature" Table; and "Evaporation and Wind" Table, and snowfall in the "Snowfall and Snow on Ground" Table, when published, are for the 24 hours ending at time of observation. The Station Index shows observation times in local standard time. (During the summer months some observers take the observations on daylight saving time.)

Snow on ground in "Snowfall and Snow on Ground" Table is at observation time for all except Weather Bureau and FAA stations. For these stations snow on ground values are at 4:00 a.m. PST, except for Bishop WB AP, Blue Canyon WB AP, and Sandberg WB which are taken at 6:00 a.m. PST, and Mt. Shasta WB City at 8.00 a.m. PST.

In the Station Index the letters C, G, H, J, and S in the "Special" column under the heading "Observation Time and Tables", indicate the following

C Weighing Rain Gage Recording Station. Hourly precipitation values are processed for special purposes, and are published later in "Hourly Precipitation Data" Bulletin.

G "Soil Temperature" Table.

H "Snowfall and Snow on Ground" Table.

J "Supplemental Data" Table

S Storage Precipitation Station. Precipitation measurements, made at irregular intervals, will be published later in "Storage-Gage Precipitation Data" Bulletin.

No record in the "Climatological Data" Table and the "Daily Temperature" Table is indicated by no entry.

Interpolated values for monthly precipitation totals may be found in the annual issue of this publication.

\- No record in the "Supplemental Data" Table; "Daily Precipitation" Table; "Evaporation and Wind" Table, "Snowfall and Snow on Ground" Table; "Daily Soil Temperature" Table; and the Station Index

\+ And on an earlier date or dates.

++ Fastest observed one minute wind speed. This station is not equipped with automatic wind instruments.

* Amount included in following measurement, time distribution unknown.

\# Thermometers are generally exposed in a shelter located a few feet above sod-covered ground; however, the reference indicates that the thermometers are exposed in a shelter located on the roof of a building.

// Gage is equipped with a windshield

AR This entry in time of observation column in Station Index means after rain.

B Adjusted to a full month.

D Water equivalent of snowfall wholly or partly estimated, using a ratio of 1 inch water equivalent to every 10 inches of new snow.

M One or more days of record missing, if average value is entered, less than 10 days record is missing. See "Daily Temperature" Table for detailed daily record. Degree day data, if carried for this station, have been adjusted to represent the value for a full month.

R Amounts from recording gage. (These amounts are essentially accurate but may vary slightly from the amounts to be published later in Hourly Precipitation Data.)

SS This entry in time of observation column in Station Index means observation made near sunset.

T Trace, an amount too small to measure.

V Includes total for previous month.

VAR This entry in time of observation column in Station Index means variable.

General Weather conditions in the U.S. for each month are described in the publications MONTHLY WEATHER REVIEW, MONTHLY CLIMATOLOGICAL DATA - NATIONAL SUMMARY, and STORM DATA, all of which may be obtained from the Superintendent of Documents, Government Printing Office, Washington 25, D. C

Information concerning the history of changes in locations, elevations, exposure, etc., of substations through 1957 may be found in the publication SUBSTATION HISTORY for this state. That publication may be obtained from the Superintendent of Documents, Government Printing Office, Washington 25, D.C. for $1.25. Similar information for regular Weather Bureau stations may be found in the latest annual issues of Local Climatological Data, obtained as indicated above, price 15 cents.

Subscription Price: 20 cents per copy, monthly and annual; $2.50 per year. (Yearly subscription includes the Annual Summary.) Checks and money orders should be made payable to the Superintendent of Documents. Remittances and correspondence regarding subscriptions should be sent to the Superintendent of Documents, Government Printing Office, Washington, D. C. 20402

CLIMATOLOGICAL DATA

CALIFORNIA

FEBRUARY 1964
Volume 68 No. 2

ASHEVILLE: 1964

TEMPERATURE AND PRECIPITATION EXTREMES

Highest Temperature: 86° on the 20th at Indio U. S. Date Garden

Lowest Temperature: -10° on the 25+ at White Mountain 2

Greatest Total Precipitation: 3.95 inches at Crescent City 7 ENE

Least Total Precipitation: 0.00 inch at 58 stations

Greatest One-Day Precipitation: 1.71 inches on the 1st at Gasquet R. S.

Greatest Reported Total Snowfall: 13.0 inches at Deer Creek Power House

Greatest Reported Depth of Snow on Ground: 120 inches on the 4+ at Mount Shasta Ski Bowl

SPECIAL WEATHER SUMMARY

Temperature: Temperatures were near or below normal on the central and north coasts and in the San Joaquin Valley, with a monthly departure of -3.2° reported from Fresno. Over the rest of the State, departures were positive, amounting to as much as 3.0° at Blue Canyon. Fresno reported the lowest mean minimum temperature of record for February and the greatest number of days with minimum of 32° or colder. Santa Maria also had the coldest February of record. At the other extreme, San Diego set a new high temperature record for the date on the 20th.

Precipitation: February precipitation totals were less than 1.00 inch at most stations in the State, making it one of the driest of record. Mt. Shasta reported the driest February in 68 years and the second driest in a record that goes back 76 years. Red Bluff reported the second driest February of record and the driest midwinter period since 1883. Blue Canyon had the least precipitation of any February. Sacramento reported the driest February in 13 years and the fourth driest of record. At Fresno it was the third February in the records with no precipitation. Santa Maria had the third driest February of record, and Burbank and Los Angeles Airport had the driest. Burbank also reported the driest December through February winter period of record.

Sunshine: A number of new sunshine records were set for February. Eureka reported the greatest percentage of sunshine of any month in the records, while Red Bluff's figure was the highest in the record for February. Fresno had the second greatest percentage of sunshine, and Burbank and Los Angeles Airport had the least cloudiness of record. Los Angeles also reported the second highest solar radiation figure for February. San Diego's sunshine was greater than any previous February.

Storms: The month experienced considerably more wind than usual with damaging northerly and easterly wind reported in both the Southern California area and the central coast on the 2d, 3d, 5th, 6th, 11th, and the 20th to the 23d. The latter period was most severe in the Southern California area with property losses of up to $2,000,000 and citrus losses that may exceed $10,000,000. Typical wind damage was to signs, trees, utility lines, buildings, and boats. Freeways were closed to trucks and trailers for extended periods during the wind.

REFERENCE NOTES

Additional information regarding the climate of California may be obtained by writing to the Weather Bureau State Climatologist, 557 Federal Office Building, 50 Fulton Street, San Francisco, California 94102 or to any Weather Bureau Office near you.

Figures and letters following the station name, such as 12 SSW, indicate distance in miles and direction from the post office

Delayed data and corrections will be carried only in the June and December issues of this bulletin.

Monthly and seasonal snowfall and heating degree days, also seasonal total precipitation for the 12 months ending with the June data will be carried in the July issue of this bulletin.

Stations appearing in the Index, but for which data are not listed in the tables, are either missing or received too late to be included in this issue.

Divisions, as used in "Climatological Data" Table, became effective with data for January 1941.

Unless otherwise indicated, dimensional units used in this bulletin are: Temperature in °F., precipitation and evaporation in inches and wind movement in miles. Monthly degree day totals are the sums of the negative departures of average daily temperatures from 65°F

Evaporation is measured in the standard Weather Bureau type pan of 4-foot diameter unless otherwise shown by footnote following the "Evaporation and Wind" Table.

Normals for all stations are climatological standard normals based on the period 1931 - 1960.

Water equivalent values published in the "Snowfall and Snow on Ground" Table are the water equivalent of snow, sleet, or ice on the ground. Samples for obtaining measurements are taken from different points for successive observations; consequently occasional drifting and other causes of local variability in the snowpack may result in apparent inconsistencies in the record

Entries of snowfall in the "Climatological Data" Table and the "Snowfall and Snow on Ground" Table, and in the "Seasonal Snowfall" Table include snow and sleet. Entries of snow on ground include snow, sleet, and ice.

Data in the "Monthly Extremes"; "Daily Precipitation" Table; "Daily Temperature" Table; and "Evaporation and Wind" Table, and snowfall in the "Snowfall and Snow on Ground" Table, when published, are for the 24 hours ending at time of observation. The Station Index shows observation times in local standard time. (During the summer months some observers take the observations on daylight saving time.)

Snow on ground in "Snowfall and Snow on Ground" Table is at observation time for all except Weather Bureau and FAA stations. For these stations snow on ground values are at 4:00 a.m. PST, except for Bishop WB AP, Blue Canyon WB AP, and Sandberg WB which are taken at 6:00 a.m. PST, and Mt. Shasta WB City at 8:00 a.m. PST.

In the Station Index the letters C, G, H, J, and S in the "Special" column under the heading "Observation Time and Tables", indicate the following:

C Weighing Rain Gage Recording Station. Hourly precipitation values are processed for special purposes, and are published later in "Hourly Precipitation Data" Bulletin.

G "Soil Temperature" Table.

H "Snowfall and Snow on Ground" Table.

J "Supplemental Data" Table.

S Storage Precipitation Station. Precipitation measurements, made at irregular intervals, will be published later in "Storage-Gage Precipitation Data" Bulletin.

No record in the "Climatological Data" Table and the "Daily Temperature" Table is indicated by no entry.

Interpolated values for monthly precipitation totals may be found in the annual issue of this publication.

\- No record in the "Supplemental Data" Table; "Daily Precipitation" Table; "Evaporation and Wind" Table; "Snowfall and Snow on Ground" Table; "Daily Soil Temperature" Table; and the Station Index.

\+ And on an earlier date or dates.

++ Fastest observed one minute wind speed. This station is not equipped with automatic wind instruments.

* Amount included in following measurement, time distribution unknown

\# Thermometers are generally exposed in a shelter located a few feet above sod-covered ground, however, the reference indicates that the thermometers are exposed in a shelter located on the roof of a building.

// Cage is equipped with a windshield.

AR This entry in time of observation column in Station Index means after rain

B Adjusted to a full month.

D Water equivalent of snowfall wholly or partly estimated, using a ratio of 1 inch water equivalent to every 10 inches of new snow.

M One or more days of record missing; if average value is entered, less than 10 days record is missing. See "Daily Temperature" Table for detailed daily record. Degree day data, if carried for this station, have been adjusted to represent the value for a full month.

R Amounts from recording gage. (These amounts are essentially accurate but may vary slightly from the amounts to be published later in Hourly Precipitation Data.)

SS This entry in time of observation column in Station Index means observation made near sunset.

T Trace, an amount too small to measure.

V Includes total for previous month.

VAR This entry in time of observation column in Station Index means variable.

General Weather conditions in the U.S. for each month are described in the publications MONTHLY WEATHER REVIEW, MONTHLY CLIMATOLOGICAL DATA - NATIONAL SUMMARY, and STORM DATA, all of which may be obtained from the Superintendent of Documents, Government Printing Office, Washington 25, D. C.

Information concerning the history of changes in locations, elevations, exposure, etc., of substations through 1957 may be found in the publication SUBSTATION HISTORY for this state. That publication may be obtained from the Superintendent of Documents, Government Printing Office, Washington 25, D.C. for $1.25. Similar information for regular Weather Bureau stations may be found in the latest annual issues of Local Climatological Data, obtained as indicated above, price 15 cents

Subscription Price: 20 cents per copy, monthly and annual; $2.50 per year. (Yearly subscription includes the Annual Summary.) Checks and money orders should be made payable to the Superintendent of Documents. Remittances and correspondence regarding subscriptions should be sent to the Superintendent of Documents, Government Printing Office, Washington, D. C. 20402

MARCH 1964
Volume 68 No. 3

ASHEVILLE: 1964

TEMPERATURE AND PRECIPITATION EXTREMES

Highest Temperature: 94° on the 31st at Parker Reservoir, and on the 30th at Death Valley

Lowest Temperature: -35° on the 10th at White Mountain 2

Greatest Total Precipitation: 10.75 inches at Gasquet RS

Least Total Precipitation: 0.00 inch at 3 stations

Greatest One-Day Precipitation: 4.33 inches on the 24th at Grass Valley

Greatest Reported Total Snowfall: 86.0 inches at Grant Grove

Greatest Reported Depth of Snow on Ground: 108 inches on the 24th at Mount Shasta Ski Bowl

SPECIAL WEATHER SUMMARY

Temperature: The month was colder than normal over the entire State with negative departures of more than 3° at some central and northern locations. While temperatures were persistently low, only a few new records were set. At Sacramento a minimum of 32° on the 7th set a new record for the date, and 35° on the 8th equalled the record for that date. Also, a 46° reading on the 22d was the lowest maximum ever observed on that date. Santa Maria had the second coldest March in records going back to 1900 and the lowest average minimum temperature for the month. Readings of 27° on the 7th and the 25th set new records for the lowest March temperature and the lowest reading so late in the month. At the other extreme Sacramento had a maximum of 80° on the 30th to equal the high temperature for that date, and San Diego set a new record for the date with an 85° maximum on the 17th.

Precipitation: Most of the State was drier than normal during the month; only a few locations reported excesses. Mt. Shasta City reported the 4th consecutive month with below normal precipitation and the driest December-March period since 1923-1924. Red Bluff has had the driest winter of record, going back to 1872.

Storms: It was an unusually windy month; Fresno reported a 41 m.p.h. reading, the highest in March since 1946. The Los Angeles City Office had 47 m.p.h. to set a new high record for March, and at the Airport the average wind speed for the month was greater than for any previous March.

Strong winds on the 16th in the San Fernando Valley, South Coast, and San Bernardino Mountains resulted in damages amounting to several million dollars and spread brush fires that caused additional damage of comparable amount. On the 7th, in unstable air following passage of a cold front, a whirlwind was formed by the hot air from a brush fire. It carried large bushes aloft and scattered the fire; trees up to 4 feet in diameter were uprooted; 2 houses were destroyed; 3 automobiles were smashed; chicken houses were blown apart; and a barn filled with hay disappeared completely.

Wind damage was reported in the southern California area on the 2d and 3d. Funnel clouds were reported on the 2d west of San Bernardino and on the 24th near Monterey. Hail was reported from several locations in thundershowers during the month. Mudslides did considerable damage in rains on the 23d over areas that were denuded by fire on the 16th.
